

Bright Skin Collection

Product | Clarity Brightening Serum 

Say “bye-bye” to brown spots with this hydroquinone-free brightening serum containing 7 powerful ingredients. Blending Arbutin and Kojic Acid with powerful plant extracts such as Peony and Licorice Root, this elixir promotes even skin tone by helping to suppress the appearance of dark spots. Both Vitamins B3 and C undo over exposure helping to repair and ward off sun damage. Brightenyl® attacks hyperpigmentation on three levels helping to suppress tyrosinase (decreasing melanin production), prevent UV-induced DNA damage, and reduce inflammation in the skin. Perfect for use while on a “HQ Holiday” or for those who do not want to use a hydroquinone product.

Directions | Apply a thin layer to clean skin.

Ingredients | Aqua (Water), Glycerin, Niacinamide (Vitamin B3), Xanthan Gum, Diglucosyl Gallic Acid (Brightenyl®), Kojic Acid, Paeonia Albiflora (Peony) Flower Extract, Sodium Ascorbyl Phosphate (Vitamin C), Arbutin, Glycyrrhiza Glabra (Licorice) Extract, Sodium Benzoate, Phenoxyethanol, Ethylhexylglycerin

KEY INGREDIENTS

- **Niacinamide:** this antioxidant inhibits skin hyperpigmentation by soothing inflammation; smooths fine lines and wrinkles.
- **Kojic Acid:** leave photo-damaged aging skin behind with this natural brightening agent. Derived from Reishi, the “mushroom of immortality”, this fabulous fungus will calm inflammation and reduce discoloration.
- **Vitamin C:** a potent antioxidant that can neutralize oxidants, such as those found in environmental pollutants and after exposure to ultraviolet radiation. Helps to inhibit melanin production, while increasing collagen synthesis. Commonly used in the treatment of hyperpigmentation and in anti-aging products.
- **Brightenyl®:** restores even skin tone by blocking the melanogenesis process at several levels and by protecting the skin and preventing its inflammation. 4x times more potent than Vitamin C, 60x more efficient than Kojic Acid. Visible results after only 28 days.
- **Peony Flower Extract:** brightens skin, antioxidant and anti-inflammatory.
- **Arbutin:** promotes skin brightening, blocks epidermal melanin by inhibiting tyrosinase.

Fun Fact | The extract of Licorice will make your melanocytes sit down and stop talking. Licorice is an antioxidant that will help reduce puffiness and calm down skin, particularly your pigment producers. This extract acts against acne pigmentation, melasma, age spots and freckling.
