

Anti-Aging Collection

Product | Copper Peptide Eye Cream 

Skin Edit | Combo, Mature, Sun Damaged

Copper-bonded Peptides in conjunction with Haloxyl™ boost elastin production and promote firming in the delicate under-eye area. Caffeine reduces puffiness while Vitamin K and Arbutin brighten eyes by addressing both hyperpigmentation and extended capillaries that lead to dark circles. Phospholipids lock in moisture and help strengthen the skin's barrier function creating lustrous peepers.

Directions | On dry, cleansed skin, apply a pea size amount under eyes dabbing gently until it is fully absorbed before applying other skincare products or makeup.

Ingredients | Ingredients: Aqua (Water), Isopropyl Palmitate, Glycerin, Propylene Glycol Stearate, Cetearyl Alcohol, Stearic Acid, Propanediol, Bisabolol, Polysorbate 60, Methylglucoside Phosphate, Copper Lysinate/Prolinate, Palmitoyl Tripeptide-1 (Haloxyl)™, Palmitoyl Tetrapeptide-7 (Haloxyl)™, Arbutin, Caffeine, Fullerenes, Phytonadione (Vitamin K), Tetrahexyldecyl Ascorbate (Vitamin C), Tocopherol (Vitamin E), Phospholipids, Vitis Vinifera (Grape) Seed Extract, Calendula Officinalis Flower Extract, Wine Extract, Bixa Orellana (Annatto) Seed Extract, Rosmarinus Officinalis (Rosemary) Leaf Extract, Hamamelis Virginiana (Witch Hazel) Leaf Extract, Steareth-20, N-Hydroxysuccinimide, Chrysin, Mica, Polyacrylate Crosspolymer-6, Phenoxyethanol, Ethylhexylglycerin

KEY INGREDIENTS

- **Caffeine:** constricts the blood vessels reducing the appearance of darkness, particularly under the eyes. Caffeine reduces inflammation and whisks excess water out of tissue helping to reduce puffiness.
- **Copper-bonded Peptides:** boosts elastin production keeping skin smooth and firm.
- **Haloxyl™:** stimulates the production of elastin and collagen by tricking skin into thinking that collagen has broken down and it's time to produce some more.
- **Tocopheryl:** naturally occurring form of Vitamin E, antioxidant, protects from oxidative stress, soothes inflammation, boosts collagen production.
- **Vitamin C:** A potent antioxidant that can neutralize oxidants, such as those found in environmental pollutants and after exposure to ultraviolet radiation. Helps to inhibit melanin production, while increasing collagen synthesis.
- **Arbutin:** Calms melanocytes reducing the overproduction of melanin; helping to reduce dark under eye circles.

Fun Fact | When skin is exposed to UV light, Vitamin E (Tocopherol) levels drop reducing its ability to protect the skin. Topically applied Vitamin E helps restore healthy levels supporting tissue repair and supple skin.
