

Bright Skin Collection

Product | Dermal C 20% Serum 

Stabilized Vitamin C has been found in clinical studies to assist in building collagenic tissue and brightening skin. Considered a super-star antioxidant, Vitamin C fights off free radicals, slows down the aging process, and even reverses the signs of aging. This formula contains 20% Vitamin C which is one of the highest concentrations on the market. Glucosamine helps boost the immune system of the cells and discourages collagen and elastin degradation. The result is smoother, firmer, plumper skin with diminished visible lines and a healthy, radiant glow.

Directions | Apply a thin layer to clean skin.

Ingredients | Hamamelis Virginiana (Witch Hazel) Extract Water, Glycerin, Ascorbic Acid (Vitamin C), Alcohol, Aqua (Water), Camellia Sinensis (Green Tea) Leaf Extract, Glucosamine HCl, Fructooligosaccharides, Wine Extract, Xanthan Gum

KEY INGREDIENTS

- **Vitamin C:** a potent antioxidant that can neutralize oxidants, such as those found in environmental pollutants and after exposure to ultraviolet radiation. Helps to inhibit melanin production, while increasing collagen synthesis. Commonly used in the treatment of hyperpigmentation and in anti-aging products.
- **Green Tea Extract:** potent antioxidant helps support skin structure and repairs cells; anti-inflammatory and astringent properties, protects against UV rays.
- **Glucosamine:** an important precursor in the synthesis of lipids and proteins. Stimulates hyaluronic acid production increasing hydration and plumpness of skin.
- **Wine Extract:** a powerful antioxidant and anti-inflammatory that contains natural Alpha Hydroxy Acids.

Fun Fact | Vitamin C goes head to head with hydroquinone in clinical studies demonstrating its ability to significantly reduce hyperpigmentation and even skin tone.
